GOVT OF MYSORE

amount in favour of the Executive Engineer, (Sanitary Engineer) for adjustment. In case there is delay on the part of the Administrater, the Sanitary Engineer may address the Audit office to get the amount adjusted through the medium of Treasury by effecting a corresponding reduction in the Treasury cash balance of the Administrator (Local Bod But it is found in many cases that the Municipalities and other Local bodies are not issuing cheques as soon as a demand is presented. As a result of this delay the amount due to Government from these Local bodies to end of March 1938 has amounted to Rs.1,66,287/- (exclusive of the dues from the Mysor City Municipality) To remedy this defect the following procedure is suggested -

9) In the first instance the Local bodies will have to be apprised by the Sanitary Engineer, about three to four months in advance of the probable amount that may be required for Annual Maintenance works of the subsequent year. The Administrator of the Fund will have to make due provision for this outlay in the Budget Estimates of the Fund and set apart that sum for meeting the demands of the Sanitary Engineer then and there To have a very effective control over the adjustment of the amount due, the Sanitary Engineer should intimate the amount of the Annual Maintenance estimate of the following year on or before the 25th of June of every year to the Treasury where the Local body has a

banking account with a request to credit 1/12 of the Annual Maintenance Estimated amount to 23 O.B.A.11 P.W.D., by transfer debit to the concerned Local Fund on the 1st of each month and the fact intimated by the Treasury to the Local body and the Sanitary Engineer

LOCAL SELF GOVT MYSORE 28 MAY 1938

(c) This rule does not apply to other cases of works of the Municipalities where the full amount of the Estimate has to be deposited by the Local Body before the works are started This new procedure is suggested since the Sanitary Engineer has now to look after a large number of Annual Maintenance works of Water Supply Schemes of Local Bodies extended over the whole state and that prompt settlement is essential and the present practice of advancing Government funds and debiting it to O.B A should be minimised as far as possible.

(11) I agree with "A" and "B" above

(12) The Municipality may be asked to credit one-twelth of the annual estimated cost every month, in advance, the difference between the estimate and actuals being adjusted at the end of the year

(13) If the Local Body fails to credit the amount monthly, the Comptroller will force adjustment in the Treasury accounts in accordance with the procedure laid down in para 477, Mysore Public Works Accounts Code.

Director of Health with the Government of
His Highness the Maharaja of Mysore,
Bangalore

To

The Secretary to Government,
Public Works Department, Bangalore.

SIR,

I have the honour to state that Annual Maintenance charges of the several water works are in the first instance paid by the Bureau of Sanitary Engineering, by charging to Objectionable Book Advance (P.W.D) and then recovered from the several Municipalities by sending demand statements after the end of each month. Such an arrangement is being followed in order to facilitate the Municipalities in paying the annual maintenance charges in small monthly instalments instead of demanding the whole charges of the year in advance as they may not be able to pay the amount in a lumpsum.

The Comptroller has observed during the last inspection of the accounts of the Bureau of Sanitary Engineer that for adopting such a procedure sanction of Government is necessary.

As such facilities are to be given to the Municipalities in actual working so that the local bodies may be enabled to utilise the services of the Bureau, I request that you may be so good as to obtain and convey sanction of Government for continuing the procedure that is now being followed in the Bureau of Sanitary Engineering.

I have the honour to be,
Sir,
Your most obedient servant,

Director of Health

Read:-

Correspondence ending with letter No.C 1787-6 dated 1/3rd March 1938 from the Director of Public Health soliciting orders in regard to the procedure followed in the Bureau of Sanitary Engineering in paying the annual maintenance charges of the several water works which are under the control of the Bureau, charging the cost in the first instance to the Objectionable Book Advance (P W.D) and recovering the same from the concerned local bodies (Municipalities, District Boards, & Village Panchayets) by sending demand statements after the end of each month, as this procedure was objected to by the Comptroller during the audit of the accounts of the Bureau.

2 Correspondence ending with U.O. Note No 10/W.A.D I dated 11/17th June 1938 from the Comptroller to Government furnishing his remarks in the matter.

Order No. L 26-46

Bangalore, dated the 27 Sep

It has come to the notice of Government that large amounts on account of annual maintenance charges of water works under the control of the Bureau of Sanitary Engineering

Engineering are outstanding payments by several local bodies in the State

2. At present, Government funds are advanced in the first instance debiting the same to Objections Book Advance. Immediately after the charge is incurred, a demand (as per article 477 of the Mysore P.W.A. Accounts Code) is sent to the local bodies concerned for issue of a crossed cheque for the amount in favour of the Executive Engineer (Sanitary Engineer) for adjustment In case there is delay in adjustment on the part of the local body, the article referred to provides for the Sanitary Engineer to address the Audit Office and to get the amount adjusted through the Treasury by effecting a corresponding reduction in the Treasury cash balance of the local body concerned But in the actual practice, it is found that, in many cases, the local bodies are not issuing cheques as soon as the demand is made. This delay has resulted in accumulation of arrears which the local bodies are unable to pay owing to their slender resources. Government therefore, consider that a change in the procedure for the adjustment of these amounts is necessary in the interests of both the Government and the local bodies.

3. The Comptroller to Government who was consulted in the matter has suggested as follows:-

" In the first instance, the Local bodies will have to be apprised by the Sanitary Engineer, about three to four months in advance, of the probable amount that may be required for Annual Maintenance works of the subsequent year. The Administrator of the Fund will have to make due provision for this outlay in the Budget Estimates of the Fund and set apart that sum for meeting the demands of the Sanitary Engineer then and there To have a very effective control over the adjustment of the amounts due, the Sanitary Engineer should intimate the amount of the Annual Maintenance estimate of the following year on or before the 25th of June of every year to the Treasury where the Local body has a banking account with a request to credit 1/12 of the Annual Maintenance Estimated amount to 23 O B.A.ii P W.D. by transfer debit to the concerned Local Fund on the 1st of each month and the fact intimated by the Treasury to the Local body and the Sanitary Engineer"

4. Government agree with the above suggestion and direct that the local bodies may be asked to credit one-twelfth of --

of the estimated annual maintenance charges every month in advance, the difference between the estimate and the actuals being adjusted at the end of the year.

5. If any local body fails to credit the amount monthly, the Comptroller may direct the adjustment in the Treasury accounts in accordance with the procedure laid down in para 477 of the Mysore Public Works Account Code.

6. This procedure may be given effect to from the year 1938-39.

Recovery from Local Bodies of the Annual Maintenance Charges of Water Works.

Issues instructions regarding the procedure to be followed for the —— under the control of the Bureau of Sanitary Engineering

READ—

Correspondence ending with letter No C. 1787 6, dated 1st—3rd March 1938, from the Director of Public Health, soliciting orders in regard to the procedure followed in the Bureau of Sanitary Engineering in paying the annual maintenance charges of the several Water Works which are under the control of the Bureau, charging the cost in the first instance to the Objection Book Advance (Public Works Department) and recovering the same from the concerned local bodies (Municipalities District Boards and Village Panchayets) by sending demand statements after the end of each month, as this procedure was objected to by the Comptroller during the audit of the accounts of the Bureau.

2 Correspondence ending with Un-official Note No. 10/W A. D 1, dated 11—17th June 1938, from the Comptroller to Government, furnishing his remarks in the matter

ORDER No L 26-46—ML. 181-37-4, DATED BANGALORE, THE 2ND JULY 1938.

It has come to the notice of Government that large amounts on account of annual maintenance charges of water works under the control of the Bureau of Sanitary Engineering are outstanding payment by several local bodies in the State

2 At present, Government funds are advanced in the first instance debiting the same to *Objection Book Advance* Immediately after the charge is incurred, a demand (as per Article 477 of the Mysore Public Works Account Code) is sent to the local body concerned for issue of a crossed cheque for the amount in favour of the Executive Engineer (Sanitary Engineer) for adjustment In case there is delay in adjustment on the part of the local body, the article referred to provides for the Sanitary Engineer to address the Audit Office and to get the amount adjusted through the Treasury by effecting a corresponding reduction in the treasury cash balance of the local body concerned But in actual practice, it is found that in many cases, the local bodies are not issuing cheques as soon as the demand is made This delay has resulted in accumulation of arrears which the local bodies are unable to pay owing to their slender resources Government therefore, consider that a change in the procedure for the adjustment of these amounts is necessary in the interests of both the Government and the local bodies

3 The Comptroller to Government who was consulted in the matter has suggested as follows —

"In the first instance, the local bodies will have to be apprised by the Sanitary Engineer, about three to four months in advance, of the probable amount that may be required for Annual Maintenance Works of the subsequent year The Administrator of the Fund will have to make due provision for this outlay in the Budget Estimates of the Fund and set apart that sum for meeting the [illegible] of the Sanitary Engineer then and there. To have a very effective control over the adjustment of the amounts due, the Sanitary Engineer should intimate the amount of the Annual Maintenance estimate of the following year on or before the 20th of June of every year to the treasury where the local body has a banking account with a request to credit one-twelfth of the annual maintenance estimated amount to 23 O B A ii Public Works Department, by transfer debit to the concerned local fund on the [illegible] of each month and the fact intimated by the treasury to the local body and Sanitary Engineer."

No. L 26-46—Mi. Fd. 37-4, DATED 2ND JULY 1938.

4 Government agree with the above suggestion and direct that the local bodies may be asked to credit one-twelfth of the estimated annual maintenance charges every month in advance, the difference between the estimate and the actuals being adjusted at the end of the year.

5 If any local body fails to credit the amount monthly, the Comptroller may direct the adjustment in the treasury accounts in accordance with the procedure laid down in para 477 of the Mysore Public Works Account Code

6. This procedure may be given effect to from the year 1938-39
